| WATER TANK POLICY | | |

Structural changes to houses or erection of structures on exclusive usage areas are subject to the approval of the Board of Trustees. This includes the installation of water tanks.

Requirements for the installation of water tanks are as follows:

- Size, location, and aesthetics should be acceptable to the Board.
- Location should be approved by the Resort Manager prior to installation.
- Tanks should be placed on a sturdy base / foundation, completely supporting the bottom.
- Foundations may be either:
 - Brick & mortar / cement and painted the same colour as the surrounding walls.
 - Treated wooden poles anchored in a cement base.
- Tanks may not extend above boundary walls.
- The overflow must be planned carefully so as not to cause damage to house or boundary walls. Any overflow must be safely diverted.
- Tank colour may be green, khaki or beige.
- Gutters leading to tanks are the owner's responsibility and for his/her account. It must be neat and properly secured.
- Owners are advised to add a locking facility.
- The Resort Manger must be advised on completion to inspect the installation and ensure that all requirements have been complied with.
- Erection of tanks must comply with local bylaws
